2. Introduction to Front End Development

14. The Front End Holy Trinity

codepen.io

> HTML, CSS, JavaScript together; demonstrates their functionalities really well

`7:42`

2. Introduction to Front End Development

14. The Front End Holy Trinity

> JavaScript: adds logic and interactivity to webpage; it's like 'verbs' of a webpage

`6:54`

2. Introduction to Front End Development

14. The Front End Holy Trinity

> CSS (Cascading Style Sheets): I need HTML to use CSS because it defines the styles of HTML; skin to the HTML skeleton... and so it's like 'adjectives' of a webpage

5:35

2. Introduction to Front End Development

14. The Front End Holy Trinity

> HTML (HyperText Markup Language): Basically it's the skeleton of a webpage, so it's like 'nouns' of a webpage

0:27

2. Introduction to Front End Development

14. The Front End Holy Trinity

> Front End vs. Back End
